*FAC Technology
Fast Axis Collimator*

Collimator Lens Focus Beam

Collimate the light path, reduce the divergence angle of the beam,
and turn the divergent light path into a parallel light path.
Smoother the edges of the laser beam.

After addition of a collimator lens, beam focus

Without optical shaping, the beam diverges rapidly

TECHNOLOGY OF BENEFIT

ACTING ON THE SUPERFICIAL LAYER OF THE SKIN, COMBINED WITH 20HZ SLFHR® FLASHES, EFFICIENT, STABLE, PAINLESS.

WHAT IS THE ARESMIX® ?

proprietary hair removal innovation is clinically proven method of laser hair removal that is virtually painless, and it is the safe laser hair removal method for all skin types, including dark and tanned skin. Its unique gradual heating and rapid/fast pulse delivery method effectively damages the hair follicle and hinders regrowth, while preventing injury to the surrounding tissue.

UPGRADE TO 4 WAVELENGTHS

755NM

The 755nm alexandrite performs hair removal on Caucasian to olive skin tones.

808NM

The 808nm gold standard in Permanent Hair Removal and is suitable on all pigmented hair and skin types.

1064NM

The Yag 1064 wavelength is characterized by lower melanin absorption, specialized for darker skin types, making it a focused solution for darker skin types.
