THE FUTURE OF BODY SCULPTING

Presentation Overview

01

The Challenge

Understanding the limitations of traditional body shaping methods.

02

Our Innovation

Introducing the Tesla EMSlim Neo Mini.

03

The Science

How HI-EMT Technology transforms muscle and fat.

04

Proven Results

Quantifiable data on muscle growth and fat reduction.

05

Product Excellence

Exploring the hardware and software advantages.

06

Versatile Applications

Targeting multiple body areas for comprehensive sculpting.

07

The Treatment Journey

A step-by-step guide for your clients.

08

Our Commitment

Unparalleled service, support, and company advantages.

09

Investment & ROI

Why this is a smart business decision.

The Struggle to Achieve Ideal Body Shape

Time-Consuming Workouts

Traditional exercise requires hours of dedication weekly, with inconsistent results.

Dieting Limitations

Strict diets are hard to maintain and often lead to muscle loss alongside fat.

Surgical Risks & Downtime

Invasive procedures carry risks, require recovery time, and involve high costs.

Superficial Solutions

Many non-invasive treatments only address fat, neglecting muscle tone and definition.

The Unmet Need: Clients seek a **fast, effective, non-invasive, and painless** solution that delivers both muscle building and fat reduction simultaneously.

The Ultimate Non-Surgical Body Sculpting Solution

Introducing the Tesla PlusHape Pro, a cutting-edge desktop device designed to meet the growing demand for advanced body contouring. It combines the power of High-Intensity Electromagnetic (HI-EMT) technology to deliver unprecedented results in muscle hypertrophy and fat cell apoptosis.

Core Value Proposition

Dual Action

Simultaneously builds muscle and burns fat.

Non-Invasive

No surgery, no anesthesia, no downtime.

Time-Efficient

Hours of exercise results in just 30 mins.

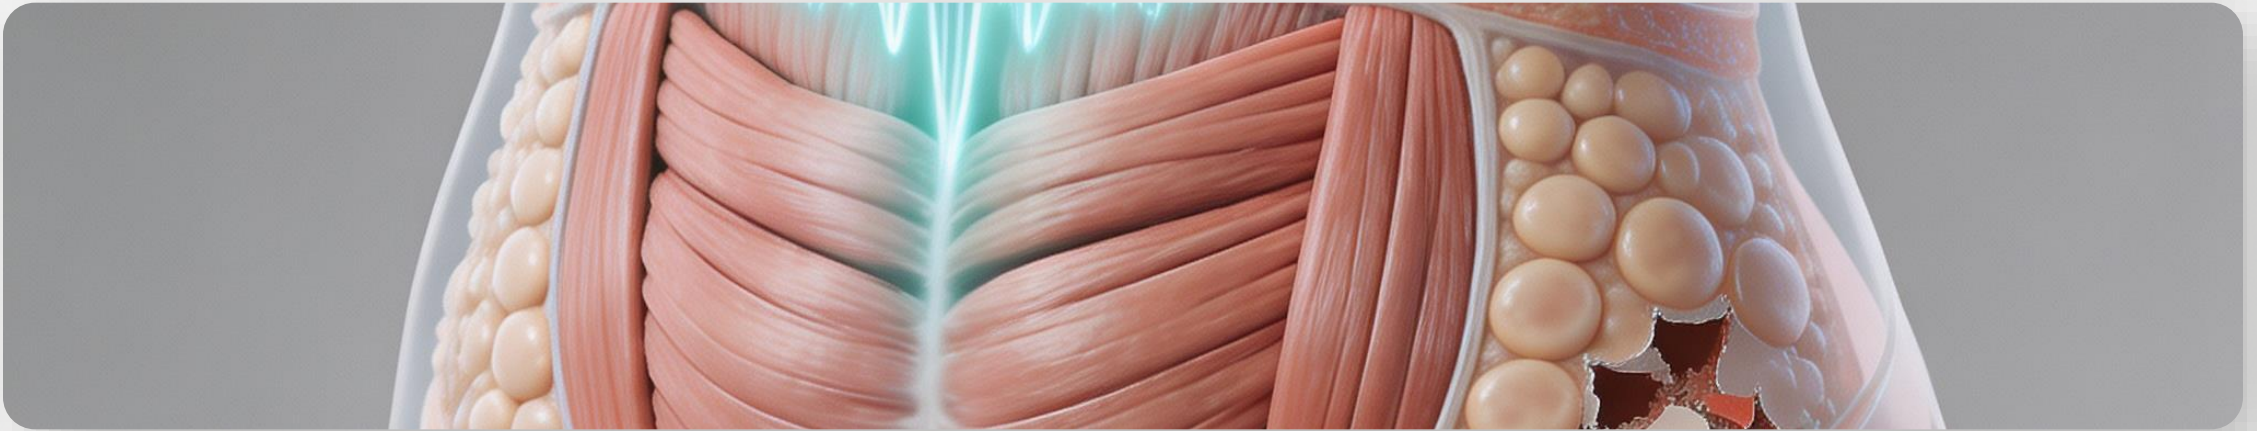

Proven Technology

Backed by rigorous science and research.

Technical Specifications

Specification	Details
Model Number	Plushape Pro
Core Technology	HI-EMT (High-Intensity Electromagnetic)
Output Power	300W - 3000W
Frequency	1-100Hz
Intensity	0-100% Adjustable
Input Voltage	AC110V/220V 50Hz/60Hz (Universal)
Cooling System	Air Cooling
Operation Mode	Automatic & Manual
Host Size	58x55x122cm
Gross Weight	60 kg
Warranty	2 Years

How It Works: The Power of HI-EMT Technology

Step 1: Muscle Remodeling

- **Supramaximal Contractions:** Triggers 100% muscle fiber activation, causing deep remodeling of the muscle's internal structure.
- **Muscle Growth:** Leads to the growth of myofibrils and the production of new muscle fibers, increasing muscle density and volume.

Step 2: Fat Cell Apoptosis

- **Metabolic Boost:** Extreme muscle contractions cause a significant breakdown of triglycerides within fat cells.
- **Cell Death:** High concentration of fatty acids leads to natural cell death (apoptosis).
- **Natural Elimination:** Dead fat cells are safely removed from the body through the lymphatic system.

Real Results Backed by Medical Research

A single course of treatment (4 sessions) delivers clinically proven outcomes that combine science with beauty:

+16% Muscle

Mass

Significant increase in muscle volume and density for a stronger look.

-19% Fat

Reduction

Noticeable decrease in subcutaneous fat for a leaner silhouette.

Key Aesthetic Outcomes

Sculpted Abs

Defined "V-line" abs & "mermaid lines"

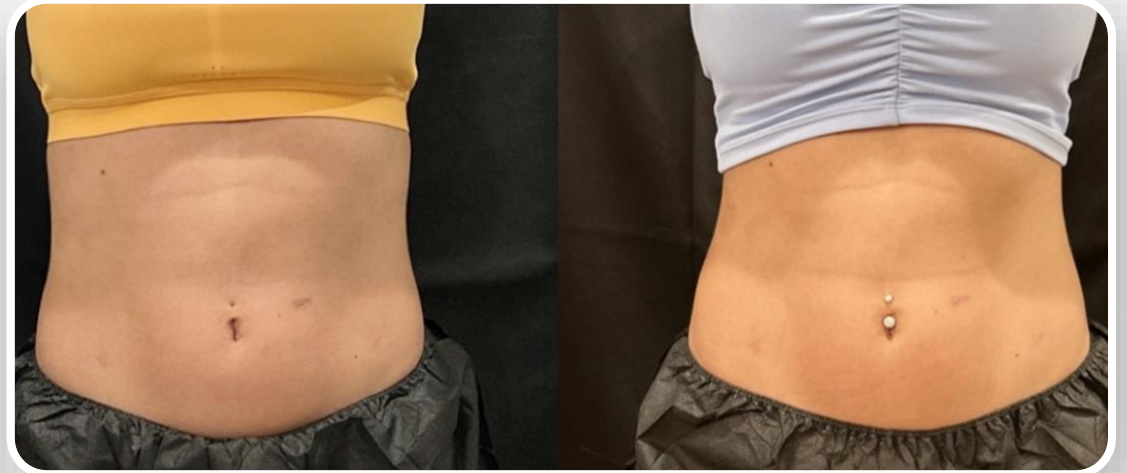

Lifted Glutes

Youthful "peach butt" appearance

Toned Limbs

Firms arms & thighs effectively

Engineered for Performance and Ease of Use

7 Tesla High Intensity

Industry-leading energy intensity for deep muscle remodeling.

Dual Magnetic Applicators

Two powerful handles for flexible, simultaneous treatments.

Compact & Mobile Design

Weighing only 38kg, fits seamlessly into any clinic.

Zero Consumables

No gels or patches needed, ensuring low operating costs.

Robust Power Supply: 300W-3000W power range for stable and powerful performance.

Intuitive Operation for Maximum Efficiency

10.4-inch Color Touch LCD Screen

Provides a clear, user-friendly interface for easy navigation.

Progressive Step Training

Software programs simulate a progressive workout for enhanced effect.

2 Pre-set Working Modes

Quick selection of optimized protocols for different goals.

Simple Operation

Minimal training required for your staff to operate effectively.

Target Every Zone with Precision

The Plushape Prois designed to effectively treat multiple key areas of the body:

Abdomen

Strengthens core muscles, reduces belly fat, and firms loose skin (ideal for post-pregnancy recovery).

Hips

Lifts, rounds, and firms the gluteal muscles for a more defined silhouette.

Arms

Tones and tightens the biceps and triceps for a sculpted look.

Thighs

Reduces saddlebags and firms the quadriceps and hamstrings.

What Your Client Experiences

01 Consultation

Brief assessment to determine goals and treatment areas.

02 Preparation

Client lies comfortably; handles are placed on target area(s).

03 Treatment

A 30-minute session with intense muscle contractions.

04 Post-Treatment

Immediate resumption of daily activities. No downtime.

05 Progression

Recommended course of 4 sessions, twice a week.

06 Continued Improvement

Results continue to improve for weeks after the final session.

The Clear Advantage Over Alternatives

Feature	Plushape Pro	Traditional Workouts	Surgical Liposuction	Other EMS Devices
Muscle Building	Yes (+16%)	Yes (Slow)	No	Limited
Fat Reduction	Yes (-19%)	Yes (Slow)	Yes	Limited
Invasiveness	Non-Invasive	Non-Invasive	Invasive	Non-Invasive
Downtime	None	None	Significant	None
Time Efficiency	30 min/session	Hours/week	Hours (Surgery)	Varies
Pain Level	Mild Discomfort	Moderate	Significant	Mild

Conclusion: The Tesla EMSlim Neo Mini offers the **best combination of effectiveness, safety, and convenience** for optimal results.

A Holistic Approach to Body Wellness

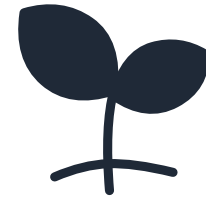

Post-Pregnancy Recovery

Improves diastasis recti and restores core strength to help women regain stability and confidence after childbirth.

Core Stability

Strengthens the entire core muscle group, improving overall body posture and significantly reducing the risk of musculoskeletal injuries.

Pelvic Floor Strengthening

Activates collagen regeneration in the pelvic floor muscles, helping to alleviate issues like urinary incontinence.

Partnering for Your Success

At LaserTell, we provide more than just a machine; we offer a complete business solution tailored to help you grow.

Generous Warranty: 2 years warranty for the main machine and lifetime maintenance support.

Comprehensive Training: Detailed manual, video guides, and 24/7 online technical support.

OEM/ODM Flexibility: Full support for custom branding and design to build your unique identity.

Reliable Delivery

Fast shipping within 3-10 working days.

Secure Payment

Accept T/T, PayPal, Visa, & more.

A Profitable Addition to Your Business

High Profit Margins

With zero consumables and a fast treatment cycle, the cost per session is extremely low, maximizing your earnings.

Attract New Clients

Offer a unique, high-demand service that differentiates your business and draws new customers away from competitors.

Quick ROI

The combination of premium pricing and consistently high client demand leads to a rapid return on your initial investment.

Versatile Revenue Stream

Easily integrate this service into your offerings: sell it as standalone treatments or create attractive package deals.

Invest in the Tesla EMSlim Neo Mini today and unlock a new level of client satisfaction and business growth.

Ready to Transform Your Business?

Let's discuss how the **Plushape Pro** can elevate your body contouring services.
